POTENTIALLY BETTER PRACTICE (PBP)

- *Meticulous attention to hand washing, with regular monitoring, surveillance and reporting of compliance.*
- *Upgrading hand-washing facilities on NICU.*
- *Avoiding contamination of the environment around each infant.*
- *Using maximum barrier precautions for insertion of central catheters.*
- *Avoiding contamination of lines through meticulous hub and line care (2% Chlorhexidine).*

Figure 1. Examples of PBP identified and implemented
